KONGRE KURALLARI

- ✓ Program bilimsel DİSİPLİNLER gözetilerek hazırlanmıştır. Lütfen programı dikkatlice kontrol ediniz. Programda çalışmanıza ilişkin eksiklik/hata olduğunu düşünüyorsanız en geç 2 Aralık tarihine kadar istanbulconferences@gmail.com adresi ile iletişime geçiniz. Programın yoğunluğu sebebiyle saat değişikliği taleplerinin karşılanamayacağını özellikle belirtmek isteriz.
- ✓ Her bir sunum için ayrılan süre 10 dk'dır. Bu sebeple sunumlarınızda temel kitabi bilgiler ve tanımları açıklamaktan kaçınarak yaptığınız çalışmanın özüne değininiz.
- ✓ Oturumun başlatılması, sunum sıralamasının belirlenmesi, soru cevap alınması, ara verilmesi oturumun kapatılması ve oturuma ilişkin tüm hususlarda Kongre Tüzel Kişiliği'ni temsilen Oturum Başkanları TAM YETKİLİDİR
- ✓ Katılım belgeleri, oturum sonunda Oturum Başkanları tarafından teslim edilecektir
- ✓ Kongre özet ve tam metin kitapları, kongre takviminde belirtilen süre içerisinde yayınlanacaktır. Kongreyle ilgili her konuda düzenleme ve yürütme kurulu üyelerimiz ile koordinatörlerimizin sizlere hizmet etmekten kıvanç duyacağını ayrıca belirtmek isterim.
- ✓ Çok değerli çalışmanızla kongremize katılarak katkıda bulunduğunuz için yürekten teşekkür ederim.

THE IMPACT OF AIR TRANSPORT, TOURISM, AND URBANIZATION ON ECONOMIC GROWTH: THE CASE OF TÜRKIYE

ABSTRACT
With the process of globalization, the increase in international trade and human mobility has made the air transport sector a strategic component of economic development. Türkiye, acting as a significant tourism and logistics hub among emerging markets, constitutes a critical case study for examining the relationship between air transport and economic growth. The aim of this study is to test the validity of the "Air Transport-Led Economic Growth" hypothesis for the Turkish economy using annual data covering the period 1995-2024. The ARDL (Autoregressive Distributed Lag) bounds test approach was applied to detect short- and long-run relationships among the variables. The analysis findings reveal the existence of a long-run cointegration relationship between the series. According to the long-run coefficient estimates, air transport (PAX) has a positive and statistically significant effect on economic growth. Specifically, it was determined that a 1% increase in air passenger traffic leads to approximately a 0.15% increase in GDP. Similarly, urbanization and energy use variables were observed to positively support economic growth. On the other hand, the model results indicate that the tourism variable had a negative coefficient on growth during the relevant period. Consequently, the air transport-led growth hypothesis is supported in the case of Türkiye. In this context, it is important for policymakers to encourage airport infrastructure investments and provide incentives supporting the sector for sustainable economic growth.
